PROJECTS

Port Scanning with Python

Scan any network with this automation port scanner. Simple to use in just a few clicks.

IP Address Locator

You only need to add the IP address in this tool, and it will automatically see you everything like your location, longitude, latitude, and area.

Bulk email sender

Small! But useable code for everyone who wants to send bulk emails in just one click by using a python automation tool.

Language Detector

Language Detector is an automation python tool that helps to detect any language like English, Italian, and many other languages.

Guess the number

You need to guess any random number from 1-10, and winning totally depends upon you, that is how much time and steps you are taking to complete or win this game.

Crack any Password Using Python

Password Cracker is an automation python tool that helps to crack any passwords if we take an example of a brute-force attack.
